# Week-in-Review: At-a-Glance

## Key Highlights

**CirrusMD announces \$20 million Series C led by Blue Venture Fund and 7Wire** – CirrusMD, provider of on-demand virtual care services, announced a \$20 million Series C led by Blue Venture Fund and 7Wire with participation from Drive Capital and the Colorado Impact Fund. CirrusMD experienced rapid growth in 2020 and saw a 150 percent increase in active members. In the same year, CirrusMD doubled the size of its provider network and added clinical specialty areas such as behavioral health. To date, CirrusMD has raised \$46 million.

**Carlyle-backed Net Health announces acquisition of ABRY Partners-backed Casamba** – Net Health, a Carlyle-backed provider of cloud-based software for specialty medical providers, announced it acquired Casamba, a provider of EMR solutions for physical, speech and occupational therapy providers and home health and hospice agencies. The combined company will have EMR and analytics products in use at over 23,000 facilities across the continuum of care, including 98% of large hospital chains. Casamba received a growth investment from ABRY Partners in 2016.

**SOC Telemed acquires Access Physicians for \$194 million** – SOC Telemed, a national provider of acute care telemedicine solutions, announced it acquired Access Physicians, a multi-specialty acute telemedicine provider, via a cash and stock purchase transaction valued at approximately \$194 million (5.4x 2021E Revenue). The combined company will deliver acute telemedicine to almost 1,000 facilities, including over 700 hospitals, and is expected to generate approximately \$110 million in pro forma 2021E Revenue. Access Physicians brings a variety of specialty offerings including infectious disease, cardiology, maternal-fetal medicine and nephrology.

**Rightway announces \$100 million Series C led by Khosla Ventures at a \$1.1 billion valuation** – Rightway, a healthcare technology and services company, announced a \$100 million Series C at a valuation of \$1.1 billion led by Khosla Ventures with participation from Thrive Capital, Tiger Global Management, and other existing investors. Rightway experienced rapid growth in 2020 and serves over 500 thousand members across 850 clients. The funding will be used to rapidly expand Rightway's footprint in the employer market and accelerate its advancement across health plans, third-party administrators and other strategic channels. To date, Rightway has raised \$130 million.

**Cityblock Health announces \$192 million Series C led by Tiger Global** – Cityblock Health, a tech-enabled healthcare provider for Medicaid and lower-income Medicare beneficiaries, announced a \$192 million Series C led by Tiger Global with participation from Kinnevik AB, Maverick Ventures, General Catalyst, Wellington Management, Thrive Capital, Redpoint Ventures, Echo Health Ventures, 8VC, and AIMS Imprint of Goldman Sachs Asset Management. Cityblock Health currently serves 70,000 members across New York, Connecticut, Massachusetts, and Washington, DC. To date, Cityblock Health has raised \$500 million.

**Crossover Health announces \$168 million Series D led by Deerfield Management Company** – Crossover Health, a relationship-based, tech-enabled, national healthcare organization that integrates both virtual and in-person care for employers and health plans, announced a \$168 million Series D led by Deerfield Management Company with participation from Perceptive Advisors, OrbiMed Advisors, Foresite Capital, Avidity Partners, SharesPost100 Fund, Irving Investors, and PFM Health Sciences. Crossover Health currently services over 400,000 employees and, to date, has raised \$282 million.

**BrightInsight announces \$101 million Series C led by General Catalyst** – BrightInsight, developer of a digital health platform for biopharma and medtech, announced a \$101 million Series C led by General Catalyst with participation from Insight Partners, New Leaf Venture Partners and Eclipse Ventures. Over the last year, BrightInsight launched three digital health products across various therapeutic areas including a high-risk Class C Software as a Medical Device algorithm, a rare disease patient support app and a regulated chronic disease management platform. To date, BrightInsight has raised \$166 million.

# Week-in-Review: Industry and Company News

## Industry and Company News

### DOJ extends review of UnitedHealth, Change Healthcare deal

- “U.S. antitrust regulators are taking a closer look at UnitedHealth Group Inc.’s proposed \$8 billion deal to acquire data and payments company Change Healthcare Inc. Officials from the Department of Justice asked both companies for more information about the transaction, according to a filing from Change Healthcare Friday. The so-called second request gives regulators more time to review the takeover beyond a standard 30-day period. If the deal closes, it would wrap a major supplier of health information-technology services into one of the largest U.S. health services and insurance providers. The Biden administration has recently signaled that it plans to take a more careful look at corporate mergers, including in the health-care industry.” [Bloomberg 3/26/21](#)

### Mastercard, b.well launch tech to enable patient ID verification

- “b.well Connected Health, which consolidates an individual’s data on its platform across providers, pharmacies, insurers and devices, announced a partnership with Mastercard Thursday to assist with patient identity verification when accessing services. Mastercard’s ID Verification service is aimed at allowing healthcare organizations to more easily authenticate patients’ identification using their mobile phones. b.well leaders note that the technology could come in handy in the near future with so-called vaccine passports. According to b.well, its partnership with Mastercard will allow healthcare organizations to replace processes for identification involving physical documents such as a driver’s license. The service combines government ID document scanning, facial biometrics and mobile phone intelligence for automated user verification.” [Healthcare IT News | 4/1/21](#)

### England’s personal child health records to be digitised by April 2023

- “Local governments will work with the Department for Health and Social Care (DHSC), Public Health England and NHS England and Improvement to log the Start for Life journey of parents and carers. The aim is to capture how they experience digital, virtual and telephone-based services during the 1,001 first days from conception to the age of two. Parents and carers will have an NHS-branded ‘one stop shop’ online to access the information required. The basis of the review is that care given during the first 1,001 days of life has more influence on a child’s future than any other time in their life. Experiences during this time have a critical impact on health, wellbeing and opportunity of children as they navigate life.” [Healthcare IT News | 4/1/21](#)

### Cleveland Clinic, IBM launch 10-year quantum computing partnership

- “On Tuesday Cleveland Clinic announced a decade-long partnership with IBM, designed to harness the power of quantum computing for next-generation medical research. With the joint launch of their new Discovery Accelerator, Cleveland Clinic and IBM aim to expand the speed and scope of healthcare and life science research, they say, and hope to uncover innovative approaches to public health emergencies such as COVID-19. Key to the new collaboration is installation of the first private-sector, on-premise IBM Quantum System One in the U.S. In addition to that on-campus deployment, Big Blue will also, in the years ahead install another next-generation 1,000-plus qubit quantum system at a client facility in Cleveland – hopefully by 2023. The clinic will also have cloud access to more than 20 other IBM quantum systems. Such computing power could enable big advances in data-intensive research areas such as genomics, single cell transcriptomics, population health and drug discovery, while also facilitating faster development of an array of new clinical applications.” [Healthcare IT News | 3/30/21](#)

## Industry and Company News (Cont’d)

### Payer lobbies cheer new bipartisan bill allowing audio-only telehealth in MA

- “Payer groups are coming out in support of a new bipartisan bill that would allow for audio-only telehealth services to be reimbursed through Medicare Advantage after the COVID-19 public health emergency ends. The bill, originally introduced in July last year and reintroduced in the House of Representatives earlier this week, would allow providers to offer medical services and consults over the telephone to MA enrollees and require MA plans to reimburse for audio-only services as if they were in-person visits, unless the plans and providers jointly decide on a different arrangement. In a statement in support of the bill, health plan lobby America’s Health Insurance Plans stressed phone calls are sometimes the only option for seniors needing to receive care in the home, especially if they live in rural or low-income areas with poor broadband access.” [Healthcare Drive | 3/25/21](#)

### FCC moves ahead with relaunch of COVID-19 telehealth program

- “This week, the Federal Communications Commission voted to move forward with Round 2 of the COVID-19 Telehealth Program, a \$249.95 million federal initiative that builds on the \$200 million program established as part of the CARES Act. The telehealth program was established with the intent of supporting providers’ efforts to continue serving patients by providing telecommunications services, information services and all of the necessary connected devices during the COVID-19 pandemic. The new application window is expected to open within 30 days of the order, and the FCC will provide notice in advance of that date. The initial \$200 million was appropriated last year by Congress through the CARES Act and helped to kick-start the program through the FCC’s Wireline Competition Bureau. The agency ran out of money in July 2020 after issuing awards to 539 applicants. The initial program sought to combat the COVID-19 crisis by bankrolling telecommunications equipment and services for qualifying healthcare providers. Round 2 contains a number of tweaks, including a system for rating applicants that prioritizes hard-hit and low-income areas, tribal communities and those in provider shortage areas, as well as projects that were not approved during Round 1.” [Healthcare Finance News | 4/1/21](#)

### Apple-backed Stanford study suggests iPhone, Apple Watch could remotely monitor heart patients’ frailty

- “iPhones and Apple Watches could enable at-home assessment of cardiovascular disease patients’ frailty via sensor data and an app-guided version of the six-minute walk test (6MWT), a traditionally clinic-based assessment of a person’s functional capacity. Conducted by Stanford University researchers and funded by Apple, the study provided 110 Veterans Affairs patients with the devices and compared their standard 6MWT performance to an in-clinic version measured by the Apple sensors, regular at-home 6MWT tests conducted through a study app and passively collected activity data. They found the app-based 6MWT to accurately determine the patient’s frailty, although there was a small dip in accuracy when the test was conducted at home that the researchers ascribed more to out-of-clinic variability than to the accuracy of the sensors.” [MobiHealthNews | 3/25/21](#)

# Week-in-Review: COVID-19 Update

## The Path to the Vaccine

- **CDC: 15% of U.S. Population Fully Vaccinated Against Coronavirus**  
“More Than 15% of the total U.S. population has been fully vaccinated against the coronavirus, according to data from the Centers for Disease Control and Prevention. With more than 143 million doses administered, over 93 million people have received at least one dose of the vaccine and more than 51 million people have been fully vaccinated. The vast majority of vaccines administered so far came from Moderna and Pfizer/BioNTech. Johnson & Johnson has delivered nearly 5 million doses, according to the data. President Joe Biden last week displayed confidence in the U.S. vaccine supply by setting a goal to reach 200 million shots in his first 100 days in office.” [U.S. News | 3/29/21](#)

## Factory mix-up ruins up to 15 million vaccine doses from Johnson & Johnson

- “Workers at a plant in Baltimore manufacturing two coronavirus vaccines accidentally conflated the ingredients several weeks ago, contaminating up to 15 million doses of Johnson & Johnson’s vaccine and forcing regulators to delay authorization of the plant’s production lines. The plant is run by Emergent BioSolutions, a manufacturing partner to both Johnson & Johnson and AstraZeneca, the British-Swedish company whose vaccine has yet to be authorized for use in the United States. Federal officials attributed the mistake to human error. The mix-up has delayed future shipments of Johnson & Johnson doses in the United States while the Food and Drug Administration investigates what occurred. Johnson & Johnson has moved to strengthen its control over Emergent BioSolutions’ work to avoid additional quality lapses.” [NY Times | 3/31/21](#)

## Canada pauses AstraZeneca vaccine for under 55

- “Canada on Monday suspended the use of the Oxford-AstraZeneca coronavirus vaccine for people under age 55 following concerns it might be linked to rare blood clots. The National Advisory Committee on Immunization had recommended the pause for safety reasons and the Canadian provinces, which administer health in the country, announced the suspension Monday. “There is substantial uncertainty about the benefit of providing AstraZeneca Covid-19 vaccines to adults under 55 given the potential risks,” said Dr. Shelley Deeks, vice chair of the National Advisory Committee on Immunization. Deeks said the updated recommendations come amid new data from Europe that suggests the risk of blood clots is now potentially as high as one in 100,000, much higher than the one in one million risk believed before.” [U.S. News | 3/29/21](#)

## No safety concerns yet seen in trials for the Pfizer-BioNTech vaccine, the companies said

- “An updated analysis of clinical trial data shows that the Pfizer-BioNTech coronavirus vaccine continues to offer strong protection without serious safety concerns, the companies said on Thursday. The new data also suggested that the vaccine works against a worrisome virus variant in South Africa, although more studies are needed, experts said. Pfizer and BioNTech made the announcement in a news release. The data have not been peer-reviewed nor published in a scientific journal. Dr. Albert Bourla, Pfizer’s chief executive, said in a statement that the new data “confirm the favorable efficacy and safety profile of the vaccine” and will allow the companies to submit an application to the Food and Drug Administration for full approval. At the moment, the vaccine has received only an emergency authorization from the agency.” [NY Times | 4/1/21](#)

## Healthcare’s Latest Developments

### FDA authorizes rapid at-home Covid-19 tests without a prescription

- “Several over-the-counter Covid-19 tests were authorized Thursday by the Food and Drug Administration for use without a prescription, offering a way for schools, workplaces and other groups to conduct rapid screening. The so-called antigen tests offer faster results with less lab work and can be used to quickly and frequently test people to catch, in particular, those who are asymptomatic and at risk of unknowingly spreading the virus. Rapid antigen tests will be especially useful for serial testing, which involves “testing the same individual multiple times within a few days, and can increase chances of detecting asymptomatic infection that might not always show up with a single test,” according to the FDA. The newly authorized diagnostic tests, which require users to collect a sample with a nasal swab, could help schools, workplaces, communities and other groups set up programs for serial testing, the FDA said.” [NBC News | 4/1/21](#)

### Spread of coronavirus from lab is extremely unlikely, WHO report says

- “The introduction of the coronavirus through a laboratory incident is considered an “extremely unlikely pathway,” for the origin of the virus, according to a report released Tuesday by the World Health Organization’s joint international team. Other more likely pathways to infection include transmission from an animal to a human or through the cold food chain, according to the team of 17 Chinese and 17 international scientists. The team drew no firm conclusion about the role of the Huanan market in the origin of the outbreak, or how the infection was introduced into the market. The coronaviruses most highly related to SARS-CoV-2 are found in bats and pangolins, suggesting that these mammals may be the reservoir of the virus that causes COVID-19, the report said. However, neither of the viruses identified so far from these mammalian species is sufficiently similar to SARS-CoV-2 to serve as its direct progenitor.” [Healthcare Finance News | 3/30/21](#)

### Air travel within the U.S. to vacation spots is bouncing back

- “American air travel has been picking up, but it is the small, regional, vacation-destination airports that are thriving a little more than a year after the pandemic, while large hub airports have just a fraction of the travelers they did at this time last year, detailed new data shows. Big-city airports, including those in San Francisco, Portland and Seattle are serving between 24 percent and 46 percent of their typical traveler volume. Smaller regional airports, including those near Jackson Hole, Wyo., and Colorado ski country, have passenger volume as much as 12 percent higher than this time last year. And these airports appear to fall into two categories: those especially close to outdoor vacation destinations, and those serving communities whose residents are more willing to travel amid a pandemic. The Centers for Disease Control and Prevention continues to advise that people refrain from widespread travel for the time being, while the agency works on travel guidance.” [NY Times | 4/1/21](#)

### Pfizer, BioNTech’s vaccine protects 12- to 15-year-olds from COVID-19

- “Pfizer and BioNTech’s coronavirus vaccine was strongly protective against COVID-19 in a Phase 3 study of adolescents, which could clear the way for expanded use of the shot beyond its current authorization for people 16 years and older. In a placebo-controlled trial of 2,260 volunteers aged 12 to 15 years, no vaccinated volunteers developed COVID-19, compared to 18 in the placebo group. Side effects were “generally consistent” with what’s been reported among 16- to 25-year-olds, and antibody responses were higher in adolescents, the two companies said in a statement Wednesday.” [Healthcare Drive | 4/1/21](#)

This document is a marketing presentation. It has been prepared by personnel of PJ SOLOMON or its affiliates and not by Natixis' research department. It is not investment research or a research recommendation and is not intended to constitute a sufficient basis upon which to make an investment decision. This material is provided for information purposes, is intended for your use only and does not constitute an invitation or offer to subscribe for or purchase any of the products or services mentioned. Any pricing information provided is indicative only and does not represent a level at which an actual trade could be executed. Natixis may trade as principal or have proprietary positions in securities or other financial instruments that are the subject of this material. It is intended only to provide observations and views of the said personnel, which may be different from, or inconsistent with, the observations and views of Natixis analysts or other Natixis sales and/or trading personnel, or the proprietary positions of Natixis. Observations and views of the writer may change at any time without notice.

This presentation may contain forward-looking statements and comments relating to the objectives and strategy of PJ SOLOMON. Any such projections inherently depend on assumptions, project considerations, objectives and expectations linked to future events, transactions, products and services as well as on suppositions regarding future performance and synergies.

Certain information in this presentation relating to parties other than PJ SOLOMON or taken from external sources has not been subject to independent verification, and PJ SOLOMON makes no warranty as to the accuracy, fairness or completeness of the information or opinions in this presentation. Neither PJ SOLOMON nor its representatives shall be liable for any errors or omissions or for any harm resulting from the use of this presentation, the content of this presentation, or any document or information referred to in this presentation.

Nothing in this presentation constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances. Each individual or entity who receives this document or participates in any future transaction shall be responsible for obtaining all such advice as it thinks appropriate on such matters and shall be responsible for making its own independent investigation and appraisal of the risks, benefits and suitability of the transactions as to itself. Any discussions of past performance should not be taken as an indication of future results, and no representation, expressed or implied, is made regarding future results. No person shall have any liability whatsoever (in negligence or otherwise) for any loss arising from any use of this document or its contents or otherwise arising in connection with this document or any other written or oral communications transmitted to the recipient in relation hereto.

PJ SOLOMON and/or its affiliates, officers, directors and employees, including persons involved in the preparation or issuance of this material, may, from time to time, have long or short positions in, and buy or sell, the securities or derivatives mentioned in this material.

The information contained herein may be based in part on hypothetical assumptions and for certain models, past performance. These assumptions have certain inherent limitations, and will be affected by any changes in the structure or assets for this transaction. This material is confidential and any redistribution is prohibited. PJ SOLOMON is not responsible for any unauthorized redistribution.
